

Collaborative Care Manager Case Review (CCMCR)

Case review: An approach, utilizing a subject matter expert to close knowledge gaps and apply problem-solving methodologies based on current evidence.

The goal: Optimize patient care by collectively brainstorming ideas and approaches to consider across delivery settings.

Targeted cases: Those that are complex as defined by diagnosis and or **conditions**, barriers and limitations, high cost and most importantly, patient ability, confidence, and desire.

Monthly Meeting Framework

- Content expert provides education
- Case review selected from submissions
- Brainstorming actions to consider
- Approaches to collaboration across teams, specialist, and care managers

**The first 6 months will be offered free of charge. During this time we will evaluate the value of the initiative. Based on the evaluation, we will determine continuation and application of fees.

Logistics:

- Register each month at www.miccsi.org
- Send a complex case for review 1-2 weeks in advance
 - ◇ Based on the selected monthly topic
- Virtually join the meeting 10 minutes before the start time
 - ◇ Follow the Zoom connection details
- Be prepared to contribute
