

## PARTNERING TO BETTER CARE

COVID-19 is impacting all of us in one form or another. Challenges are personal, professional, and for some, financial.

It is in our coming together as a community, to help and support, we can help one another and make a difference.

Mi-CCSI's mission is to "partner to better care" and providing education at no cost is one way we can contribute at this time.

From April 15, 2020 through October 15, 2020 (six months) to help those who would benefit and who will use the information to benefit others we will be offering two of our Disease Management training programs at NO COST.

These include:

1. Asthma/COPD
2. Congestive Heart Failure (our newest offering)

NOTE: Each program will offer CEUs also at NO COST.

Utilizing virtual training via recorded webinars, we will be providing these meaningful sessions as a pathway to CEU acquisition, while eliminating financial barriers.

- The Asthma/COPD learning series is currently available online at:  
<https://www.miccsi.org/training/asthmacopd-learning-series/>
- The two-part Congestive Heart Failure enduring series will also be available online in May.

Questions related to registration and logistics can be directed to Amy Wales at [amy.wales@miccsi.org](mailto:amy.wales@miccsi.org).

Questions related to the clinical content can be directed to Sue Vos at [sue.vos@miccsi.org](mailto:sue.vos@miccsi.org).

We wish you all many blessings during this challenging time and are grateful to you for your courage, compassion, caring, and skills at a time when they are needed most.

Sincerely,

Thomas Dahlborg  
Executive Director
