

COMPASS

Care Management Phases & Follow-up Guide

This tool provides recommended guidance for the COMPASS team assisting a patient through the phases of care. Each system has to determine the tailoring needed within their own processes to operationalize this guide to its fullest. Above all, remember the patient is fluid and not a referral to be “handed off” to any one team member and then “given back”. Communication leading up to and following each transition is critical to ensure all members of the team including the patient are aligned with the same goals. Stages of change and readiness are parallel aspects of this flow and may resonate with some users in applicability.
