

PARTNERING TO BETTER CARE

The pandemic remains a national crisis impacting all.

Based on the continued challenges and stressors on those providing care, Mi-CCSI is expanding its FREE On-line enduring Disease Management learning activities to those previously offered and adding the diabetes and metabolic syndrome modules for new participants beginning October 1, 2020 through December 31, 2020. All enduring learning activities have nursing and social work continuing education available.

The FREE options between October 1st and December 31st include:

- Asthma/COPD
- Heart Failure
- Diabetes
- Metabolic Syndrome

Questions related to the clinical content can be directed to Sue Vos at sue.vos@miccsi.org.

We are grateful to you for sharing your courage, compassion, caring, and skills with others.

Sincerely,

Tom

Executive Director
