# **Managing Medication Side Effects**

# Fatique

- Take your medicine at bedtime
- Take short naps
- •Exercise

# Dizzy/Lightheaded

- Get plenty of fluids
- Get up slowly when seated or lying down
- •Ask your health care provider if wearing support hose will help

#### Dry mouth/eyes, constipation, water retention or fast heartbeat

- Drink liquids and sip water often
- Brush teeth two times a day and use sugarless gum or candy
- Eat more fiber

### **Upset Stomach or Nausea**

•Wait 1-2 weeks. Nausea often goes away on its own Take medicine with meals Ask your health care provider about adding another medicine like an antacid

## Jitters, shakes or tremors

•Ask your health care provider if your depression can be managed with a lower dose of medicine

### **Restlessness, Anxiety and Agitation**

- Ride a bike, jog or do other vigorous exercise
- Stay busy and focus on other things
- Use relaxation tools like muscle relaxation and deep breathing exercises
- Talk to your provider about changing medicines or adding a medicine to help you relax

#### Headache

- Take a pain relieve like acetaminophen (Tylenol or others) if your health care provider approves
- Ask your provider about taking a smaller dose

### Insomnia (Hard Time Sleeping)

- Avoid caffeine (found in pop, coffee and chocolate)
- Take antidepressant in the morning
- Ask your health care provider about taking a medicine to help you sleep

### Weight Gain

- Choose fruits, vegetables and whole grains and limit sweets, sugary drinks and fast foods •Exercise 30 minutes each day
- •Talk with your health care provider about changing medicines or doses

# Problems with Sexual Function

• Ask your health care provider about changing your dose or your medicine •Ask your provider about adding another medicine to treat sexual dysfunction • Using medicine one time daily and planning sexual activity before that dose
