- Training Programs
- January CM Leadership Collaborative Updates
- Available Continued Education Sources

2026 Training Programs

Mi-CCSI is an approved training partner for BCBSM PGIP trainings, The State of Michigan through a CMS Grant to address Opioid Over Use, titled MOSODA, and under a special contract with the Ontario Health Care System Municipality, Southlake Health. See trainings offered by MI-CCSI on our website at https://www.miccsi.org/.

If you are interested in a customized training, please outreach to schedule an exploratory meeting with one of our staff.

About the MI-CCSI CM Leadership Collaborative

Q: Who participates in the CM Leadership Collaborative?
A: Leaders that have oversight of Care Management work and or support the care management team within their organization, and are members of MI-CCSI.

Q: What is the purpose of the CM Leadership Collaborative?
A: Timely, helpful, information updates, problem-solving, and sharing of best practices.

Quotes from members of the CM Leadership:

"I really appreciate the support and follow up."

"......a wealth of information!"

".....appreciate the partnership."

PDCM Billing and Coding		

January Review of External Training Resources

- Commission for Case Management Certification (CCMC) offers a number of trainings applicable to case managers. Through the CCMC CMLearningNetwork, care managers can find educational offerings.

- The CMLearningNetwork offerings can be found by going to the Commission for Case Management Certification (CCMC) site and or directly through the CMLearningNetwork link (for non-member access): https://ccmccertification.org/workforce-development/cmlearning-network/webinars. Some of the topics are:
  - Care Management and Navigating the Shift
  - CCMC Code of Professional Conduct
  - Integrated Case Management: Recentering Mental Health

- Prime has a variety of CE/CME available specific to different professions, to include Providers, Nurses, and Social Workers. When visiting the site (at https://primeinc.org/cme/ancc/type/all), the visitor selects the role and topic of interest to filter the trainings available for their profession and area of interest.

- In my filter, I selected nurse and the topic, "Public Health and Prevention."

- In the available listings on this topic, I located a presentation titled "Optimizing the Primary Care Team for Success in Value-based Care." The direct link to this training can be found here: https://primeinc.org/online/optimizing-primary-care-team-success-value-based-care. Below is a description of this training offer.

Optimizing the Primary Care Team for Success in Value-based Care.

Intended Audience: Primary care physicians, nurse practitioners, physician assistants, and other clinicians in primary care

Join expert faculty in this engaging video-based activity reviewing key strategies for implementing and sustaining value-based care programs in primary care settings. Designed for healthcare professionals, this activity outlines practical approaches to enhance team performance, improve patient outcomes, and align with better payment models.

This session provides actionable insights into:

- The principles of value-based care and how they differ from traditional fee-for-service models.
- Strategies for building interprofessional teams that deliver patient-centered, equitable care.

Real-world examples of successful value-based care implementation in primary care settings.
